# CMU New Platform: CMU New Platform 2.0 Is on the Way

## Enhanced core platform capabilities

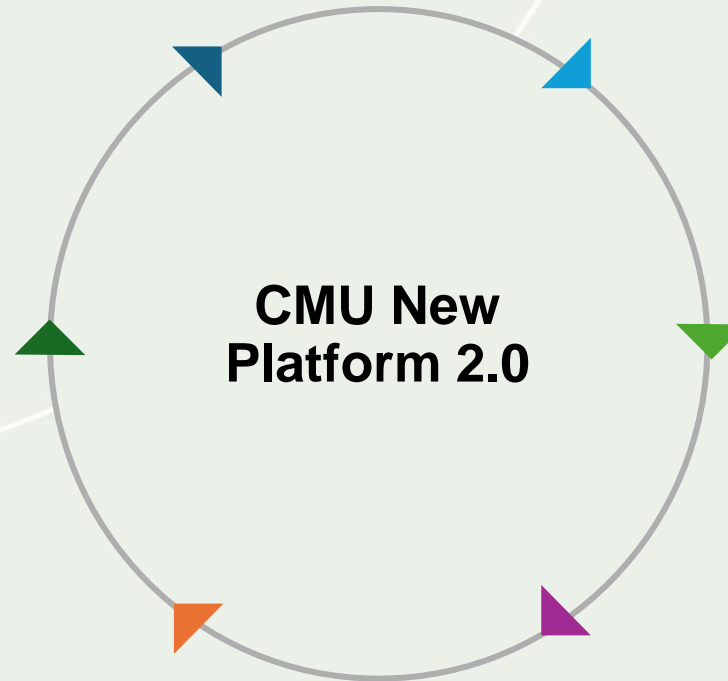

Introducing a robust system foundation to support the next stage of CMU's development

## Smarter collateral and post-trade functions

Enhanced collateral management and settlement engine capabilities will support improved asset optimisation and greater settlement efficiency

## Wider access channel

Internet, SWIFTNet, ICLNet, Open API, SWIFT and file transfer capabilities (FTS) support more seamless straight-through processing

## Enhanced cash and settlement capabilities

New arrangements will support more streamlined funding, settlement and processing across migrated services

## A more intuitive user experience

Modernised primary interface for migrated services, providing a more modern and efficient operating environment

## Built for a more connected future

Strengthened infrastructure to support evolving market needs and future platform development
